Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicants and Applicants' representative were present for the interview. The parties explained the invention in view of the 112 rejections. During the interview, it was noted that the terms in the claims are not enabled because the specification is inconsistent in defining the terms used in the claims. As an example, applicants' specification page 8, line 1 defines a cartridge as a collection of events. Then in line 15, the applicant defines events as triggers which occur within a cartridge. As another example, the specification mentions that a cartridge stores data, but does show a memory device configured to store data. Applicants further indicate that a user of a device enters a zone of influence and a doorway is flashed (believable on the screen of the device). Then the user approaches the door. How does the user approach or open a door on a screen? These are some of the conflicting issues that are not properly addressed in the disclosure.
